

Meeting Date: March 30, 2020

Participants: Rosalia Gomez, Jay Alameda, Aaron Weeden, Bob Panoff, Valerie Herold

Notes:

1. Program Updates – response to COVID-19
 - a. XSEDE EMPOWER – Aaron gave mentor applicants the opportunity to edit their application for Summer 2020 to reflect changes that may result from COVID-19. Aaron will be reaching out to potential application reviewers this week.
 - b. C4C/ACSC – Currently recruiting. C4C shouldn't be affected since it will be co-located with SC20. ACSC on the other hand is considering becoming virtual if PEARC20 becomes virtual or cancels the conference. The executive committee is monitoring the PEARC20 COVID-19 web page and has been in communication with the PEARC20 committee.
 - c. International HPC School – also exploring virtual delivery.
2. Leveraging XSEDE BP efforts – XSEDE program recruitment will be supported in the Fall/Spring with conference exhibiting at Tapia (Sept), SACNAS (Oct), and ERN (Feb 2021).
3. Additional Items
 - a. Computational Chemistry for Educators will be delivered virtually.
 - b. Parallel Programming curriculum workshop is cancelled.
 - c. Bob is teaching an online course on Scientific Investigations using Computation at Wofford College.
 - d. Bob also shared Shodor resources with Valerie to promote via XSEDE Newsletter in May.
