

## Constitution of the UREP

The Use Requirements Evaluation and Prioritization (UREP) group evaluates and prioritizes requests for software based capabilities that XSEDE can provide to enable science. Requests may come from users, SPs, campus champions, and XSEDE staff. UREP established priorities guide XCI's capability implementation and delivery activities.

Each UREP member's vote counts equally. The makeup of the UREP should be balanced so that all stakeholders are fairly represented. Current UREP members are:

- Campus Champions representative (1)
- SPF representative (1)
- Members of the User Advisory Committee (~15)
- WBS representatives, generally an L3 but sometimes an L2; CEE and ECSS have multiple members; they are larger groups and they are user-facing (~10)

There is some overlap. For example, for the UREP, Dana Brunson represents Campus Engagement in CEE but she is also the face of the Campus Champions. The list of current members is given below.

XCI asks that the SMT review the constitution of the UREP and advise how it should be changed, if at all, to ensure that all stakeholders influence priorities appropriately based on the number of votes.
