

Metrics Dashboard

The [XSEDE Metrics Dashboard](#) was specifically created to allow more in-depth metrics analysis, including trend analysis. The tool is updated as per the [XSEDE project reporting schedule](#) and contains multiple views and allows for customized views allowing analysis of metrics to a greater extent. The tool is accessible via the [XSEDE website](#) and [XSEDE User Portal](#). The tool contains metrics from the initial 5 year XSEDE project (2011 - 2016) as well as the current 5 year XSEDE project (2016 - 2021). Currently, KPIs, L2 Area Metrics and L3 Area Metrics are included in the XSEDE Metrics Dashboard. Other Metrics are not available on the XSEDE Metrics Dashboard. See the [Metrics Dashboard Documentation](#) for additional information on access, usage, data entry, administration, and change management.

Further Information

- See the [Metrics Dashboard Documentation](#) for additional information on access, usage, data entry, administration, and change management
- [Metrics Dashboard Change Management Worksheet](#)
- [Administrative Console](#)
- [Metrics Dashboard Data-loaded Wiki Page](#)
