

WBS 2.3.2 RACD Roles

Roles

Although individuals have assigned roles, our intention is to be fluid between integration and evaluation/testing engineers.

Requirements Analysis

- Assist CEE in preparing use cases
- Work with the UREP to establish priorities
- Prepare Capability Delivery Plans "CDPs"
- Identify and manage proposed activities in JIRA
- Manage defects and feature requests in JIRA
- Help prepare design documents and draft implementation plans
- Coordinate activities with collaborators

Development and Integration Engineering

- Prepare component packages and administrator documentation
- Help prepare user documentation
- Work CEE to prepare training material
- Prepare testing plans
- (Minor) development
- Help analyze/reproduce potential defects
- Maintain defects and feature requests in JIRA

Evaluation and Testing Engineering

- Help identify components and partners with solutions that may fill gaps
- Evaluate potential components
- Test components that are ready for production
- Help analyze/reproduce potential defects
- Maintain defects and feature requests in JIRA
