

# 202010- RACD User Needs Gathering

## Decisions:

Summary	Description

## Action Items:

Summary	Description	Responsible	Due Date
Add user stories to RSP	Add the two user stories proposed by Ruth M. to the Research Software Portal use case repository	Lee Liming	3/20/2020

## Notes/ Discussion items:

Ruth Marinshaw (Stanford) asked a question (originating from her campus) about why a researcher would need a CILogon Silver certificate. Lee and JP answered, noting that there are two use cases related to this in the use case repository ([IDM-17](#) and [SPI-13](#)) and referring Ruth to the CILogon documentation for more info. Short answer: It's mainly to access research systems in other countries that require X.509 certificates with a certain level of assurance for user authentication. These are mostly in High Energy Physics and disciplines that use Open Science Grid resources.

Ruth proposed the following two user stories. We believe that the first is most likely NOT currently available in XSEDE and we believe that the second is already happening.

- A campus champion needs to find out who at their institution has been using any of the XSEDE science gateways. Ideally, this would happen routinely without prompting (e.g., a monthly report).
- A campus champion needs to find out who at their institution has an XSEDE allocation. Ideally, this would happen routinely without prompting (e.g., a monthly report).
