

# Single Slide Repository

Do you have a presentation slide you'd like others to include in their presentation? Share it here. Include a comment on content and who could, or should, include the slide. The idea is to provide a single slide that anyone could include in their presentation deck. If you wanted to, you could upload several single slides, e.g. one for the program in general, another for a specific subset of your topic; a person may want to use one, the other, or both. ... What would you like others to say/show about your program?

Remember that the person who is using your slide does not know your topic! Include links for more information, and/or slide notes.

Use the current 16x9 PPT template from this page:<https://confluence.xsede.org/pages/viewpage.action?pageId=1671288>

Drag your slide to the page, add the requested information, then click on the paperclip above to edit the listing further.
