Jason St. John, Purdue

Francis Dang, Texas A&M

Jeffrey Frey, University of Delaware

Trevor Cooper, SDSC

Vikram Gazula, University of Kentucky

Shava Smallen, XSEDE

Anita Schwartz, University of Delaware

John Huffman, University of Delaware

Paul Williams, XSEDE

Kevin Colby, Purdue

David Carver, TACC

Tabitha Samuel, XSEDE

Notes:

- New versions of SP checklist (v4.3) and SP Software and services baseline (v 2.2) are out. They are available at [Project Documentation](#). You can navigate to this page by going to www.xsede.org About Project Documents
- GCT packages have been released and are available for installation and deployment.
- Research software portal tool is now available. This is particularly useful to SPs who do not need to install the whole IPF suite, but only need to report a few services, for eg. gateways.
- New search capability available on the XSEDE software directory: <https://software.xsede.org/search/> . Cloud images are now searchable.
- XSEDE RACD group is now exploring the possibility of having an XSEDE wide Open on Demand deployment available to the XSEDE community.
- Updates from SPs:
 - University of Kentucky: Basic build of the cluster is in progress, have Globus working.
 - Purdue, University of Delaware, Texas A&M: On track for scheduled production dates.
