Meeting Minutes:

Announcements

- Discussed new look and feel of the XSEDE Community Software Repository site at <https://software.xsede.org/> and new home of the SP software and deployment plans
- Discussed the XSEDE'xy conference moved to PEARC'xy conference. See <http://www.pearc.org/> and the [call of participation](#).
- SSO Hub now requires two factor for login. Decision whether to make this permanent coming soon.

Software/Services/Engineering Activities

- Victor will be circling back on the recent SP checklist reviews and review the outstanding action items. Contacting SPs about this.
- For those with Science Gateways see the [SDIACT-187 Incremental gateway_submit_attributes fixes and enhancements](#)
- A new XDCDB API [SDIACT-216 Improve XDCDB security and read/update access with a new RESTfull API](#)
- User Engagement and Operations looking at reviewing CUE description.
- Rating of GSI OpenSSH version 7.1 – This was due on 1/31 and will check to see if Shava still wants input on this or not.
- A new page has been created with all resources in RDR. See <https://software.xsede.org/xcsr/xsede-resource-status>
- Activity working its way to activity launch for non-allocated L2/L3 SPs to be able to access the SSO Hub to allow users to login to SSO Hub to get to L2/L3 resources

SP Coordination

- Stampede 2 June 1, 2017 target production date. Starting integration process with TACC
- New Science Gateway institute joined XSEDE Federation

Open Discussion (as time permits)

No extra items discussed
