2016-10-18 Meeting notes

Date

18 Oct 2016

Attendees

- Scott Wells
- Tim Boerner
- Jim Marsteller
- Tabitha Samuel
- Gary Rogers
- Gregory Peterson
- Victor Hazlewood
- Mike Pingleton
- Julie Wernert

Agenda

- Status of XSEDE2 ticket queue conversion
- Update to the XSEDE Acceptable Use Policy
- Cloud services discussion
- Central Services security monitoring and scanning
- Upcoming IPR information/instructions
- Mgr coordination

Discussion items

Time	Item	Who	Notes
6min	Status of XSEDE2 ticket queue conversion	Mike	- Still need some queues for the CEE division. - The 1.6.5 campus bridging queue can be retired as it goes with XCI. - Victor will check with Chris and Kelly on the last few XSEDE1 queues and what to do with them.
2min	Update to the XSEDE Acceptable Use Policy	Victor	Jim to review and update the AUP and send recommendation draft to Greg to review and bring to XSEDE leadership
19min	Cloud services discussion	Victor	Discussion about possibly moving services to the cloud as requested by John/Dave (I obtained some cost info). - Questions that come into play are the compute capacity and storage needed. Most likely a dedicated host resource not on demand. - Perhaps come up with categorization of which services could easily move to cloud. We need to check. - Need to also consider the cost of moving the service and the cost savings for application administrator. Also some of the internet costs. - Need to include the 5 data center contacts to discuss this further as well. Need to know when their upgrade timeframe is.
8min	Central Services security monitoring and scanning	Jim	- perfSONAR devices are not Enterprise Services and are not required to be listed in XES-index. - Regarding perfSONAR getting scanned by the Qualys services, Tim will bring this up on the next call and discuss with adding this scanning to Qualys for the perfSONAR systems. - Jim asked if there are other services that are not in XES-index that need to be monitored and scanned? The gateway systems are an example. Could look at those systems in the XSEDE Nagios to see what is not in XES.
2min	Upcoming IPR information /instructions	Scott	- We will be reporting on Sept and Oct for the first report of XSEDE2. - Scott will be sending each L3 their template and information on how to complete this. - There was also a reminder of the email from Leslie Morsek regarding Other Metrics that provides some instructions on how to complete these metrics in the report Appendix.
NA	Mgr. coordination	None	Not discussion. Meeting ran over, so this item was tabled.

Action items

- ☑ Victor Hazlewood:
    - Check with Chris and Kelly on the last few XSEDE1 queues and what to do with them.
  Jim Marsteller:

- Review and update the AUP and send recommendation draft to Greg to review and bring to XSEDE leadership.

Tim Boerner:

- Will bring up on the next call discussion about adding scanning to Qualys for the perfSONAR systems.
